

# Fever-Screening Thermal Solutions

With advanced detectors and algorithms, Lantec's Fever Screening Thermal Cameras can detect elevated body temperatures in moving crowds such as passengers, commuters and shoppers with accuracy up to  $\pm 0.3^{\circ}\text{C}$

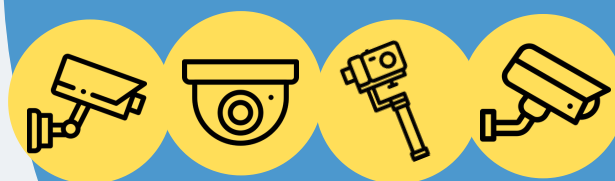

## High Efficiency

Detect a persons temperature in **ONE SECOND**

## Increased Safety

Avoid physical contact with **NON-CONTACT** measurement

## Fever-Screening Thermal Cameras

Temperature measurement range: 30-45°C  
Working temperature: 10-35°C  
4 cameras to choose from

### 1. Handheld Camera + Tripod + iVMS-4200 or Hik-Thermal (Mobile app)

With a Wi-Fi module, the TP21B handheld camera can connect to a PC or a smartphone to notify operators when a person with an elevated temperature passes by. It also features a built-in speaker for audio alarms.

### 2. Turret/Bullet Camera + Tripod/Bracket + iVMS-4200 + Laptop

The turret/bullet camera features AI detection to reduce false alarms caused by other heat sources.

### 3. Turret/Bullet Camera + Blackbody Calibrator + Tripod/Bracket + iVMS-4200 + Laptop

Solution 3 is an enhanced version of solutions 2 with a blackbody calibrator to increase the temperature accuracy from  $\pm 0.5^{\circ}\text{C}$  to  $\pm 0.3^{\circ}\text{C}$
